

ALL Out Security Putting you in Control

ALL Out Security for World Software

At last! A complete security solution for JD Edwards “out of the box”.

No need to worry about menu security, function key exits, hidden selections and all the other complications of standard JDE. Focus on the programs a user can access, their action code authority, and build your security from there.

Deliverables

Discovery program

Discover all programs/versions a user is accessing.

Lock program

Lock your users into the list

Access report

Report who **can** access what and display action code settings.

Security management program

Resolve access and action code security issues in one place.

New access history file

Records all access, including back-doors

Monitoring and report program

Report who **has** accessed what

Critical programs filter

Limit above reports to critical programs using the lists supplied

Segregation of Duties report

Create rules and report on breaches

Comprehensive list of SOD Rules

Coming soon: Net change reporting

ALL Out Application Security

Provides a State of the Art locking solution for Programs and Versions.

Capturing all user access, ALL Out automatically creates a “permission list” of every program or version a user is accessing. Then use ALL Out to lock your users into the list.

Automatic set-up means no implementation costs

No need for a massive project to lock your system down. You can focus on the real issues – identifying and removing areas where you are exposed to risk.

ALL Out Exception Reporting

Segregation of Duties rules

Build rules to identify areas of risk within your business and report on who has, or can, breach them.

Focus on critical programs

Cut down the amount of time your managers spend approving access lists by limiting reports to critical programs.

Available on Subscription

No up-front license fees – ALL Out Security is available for a monthly subscription fee with no complex cancellation clauses. Just pay for it as you need it. Subscription rate is based on your iSeries software group. See our web-site for details on how to subscribe. Delivered by email, installed in minutes!
