

# Data Access Studio™

**Data Access Studio™** provides you the benefits of quick, secure, flexible and easy access to information in your J.D. Edwards database, saving you money by significantly reducing your query efforts and report writing costs.

Data Access Studio is an easy to use, but powerful, visual query and report writing solution. It uses a working model that allows you to view the query or report as you build it. Written specifically for OneWorld® and EnterpriseOne®, Data Access Studio is a solution that leverages EnterpriseOne's native security model, without any ODBC risk!

In addition, Data Access Studio delivers:

- ✓ Data Dictionary integration
- ✓ Database and release compatibility
- ✓ Read-only access

Resulting in a trouble-free and secure operation for your organization.

Users will love the ability to be able to use this solution with little or no training. IT will love it for its ease of installation, security and low impact on performance. This gives you the advantage of utilizing your investment to its fullest potential.

## So what can you do with Data Access Studio™?

### Easily access EnterpriseOne® data:

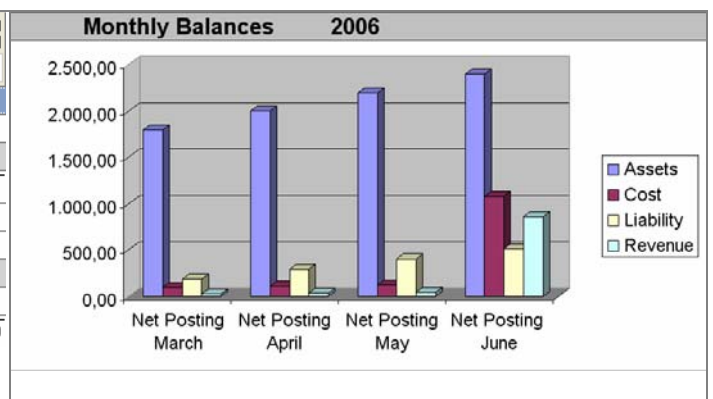

- ✓ Query *all* available *tables* and *business views* (controlled by the EnterpriseOne® Security model)
- ✓ Filter, Sort, Group, Summarize.
- ✓ Take advantage of Data Dictionary, UDCs, and Search Forms
- ✓ Read-only access to data
- ✓ Easy export to Excel or simply embed Excel in your Data Access Studio queries
- ✓ Windows Shortcut enabled (i.e. CTRL-C and CTRL-V)
- ✓ Create your own Business Views.

### Calculate data on-the-fly:

- ✓ Lookup related data dynamically
- ✓ Calculate sums, totals & sub-totals
- ✓ Retrieve data from other tables by creating your own table joins
- ✓ Perform Date operations, and much more!

## Create eye-catching reports:
